Firebase Admin SDK

Your Firebase service account can be used to authenticate Database, Storage and Auth, programmatically via the unified Firebase Admin SDK.

Firebase service account
firebase-adminsdk-fbsvc@ashtalakshmi-2432f.iam.gserviceaccounts.com

 **Key creation is not allowed on this service account key creation is restricted by organization policy**

Admin SDK configuration snippet

☒ Node.js

☐ Java

☐ Python

☐ Go

```
var admin = require("firebase-admin");

var serviceAccount = require("path/to/your-service-account-key.json");

admin.initializeApp({
  credential: admin.credential.cert(serviceAccount)
});
```
